

Using the New Moon Morris Spreadsheet.

You are presumably reading this .pdf page on your laptop/PC/phone. Good, we're half-way there already.

There is only One True Sheet, held by M\$Google, and we all interact with it. For pedants, it's actually a workbook containing several sheets, but that's just Google for you.

Here is the URL of the One True Sheet:

<https://docs.google.com/spreadsheets/d/1G95NNAfG-eluxtHrc5jgFETzAm7YjLHRJkde3JRjhTI/edit?usp=sharing>

On a laptop/PC click the URL above. When the sheet opens in your browser, BOOKMARK it (or click the star icon or Favorite or whatever) and make sure you can find that bookmark easily, by, for example, making sure it's in a prominent position on your bookmarks toolbar. That's it, you're done, you can access the sheet whenever you like, but *read Part Two below*, please.

On an Android or iOS phone, download the Sheets App. It looks like this:  You can skip the payment setup.

Once the app is installed, switch to this document and press the URL above.

The sheet should open in the app. If it doesn't, it may ask if you want to open it in the Sheets app – accept. If it opens in a browser instead (probably with some message about limited functionality), close it and try the URL again, but this time with a “long press” which should offer you a choice about where to open the link – choose the app.

That's it, you're done, the sheet is there in the app whenever you need it. But *please read Part Two below*.

Part Two

The Sheet is EXTREMELY VULNERABLE and FRAGILE. We all have editing rights. In theory each of us can be restricted to just our name's row for editing purposes, but it's complicated. The Web-Elf may have another go at doing that when he has a free fortnight. Until then, please RESTRICT ALL EDITING to your own row, and NEVER SHARE THE LINK to the spreadsheet to non-NMM folk.

Don't make copies of the spreadsheet, don't download it, don't save it to your own Drive or computer or phone, then edit it and wonder why you're out of sync with the One True Sheet.

Interact solely on the sheet through the phone app or the PC bookmarked link.

*There are rumours of members finding themselves with two differing copies of the sheet, possibly by doing what is subtly hinted you should **not** do (see above). In that case, just delete/remove them both/all and use the link to the One True Sheet as described at the top of this document. Removing your entry/entries from your app does not destroy the One True Sheet.*

It turns out that you do not need a Google account or a gmail address to access the NMM Sheet. Your use of the app will simply be a little limited if you haven't – you won't be able to create your own sheets, for example.
